Irah Solution

Corporate Profile

We build and create

Make life simple

*It is really that easy for you, and for us*
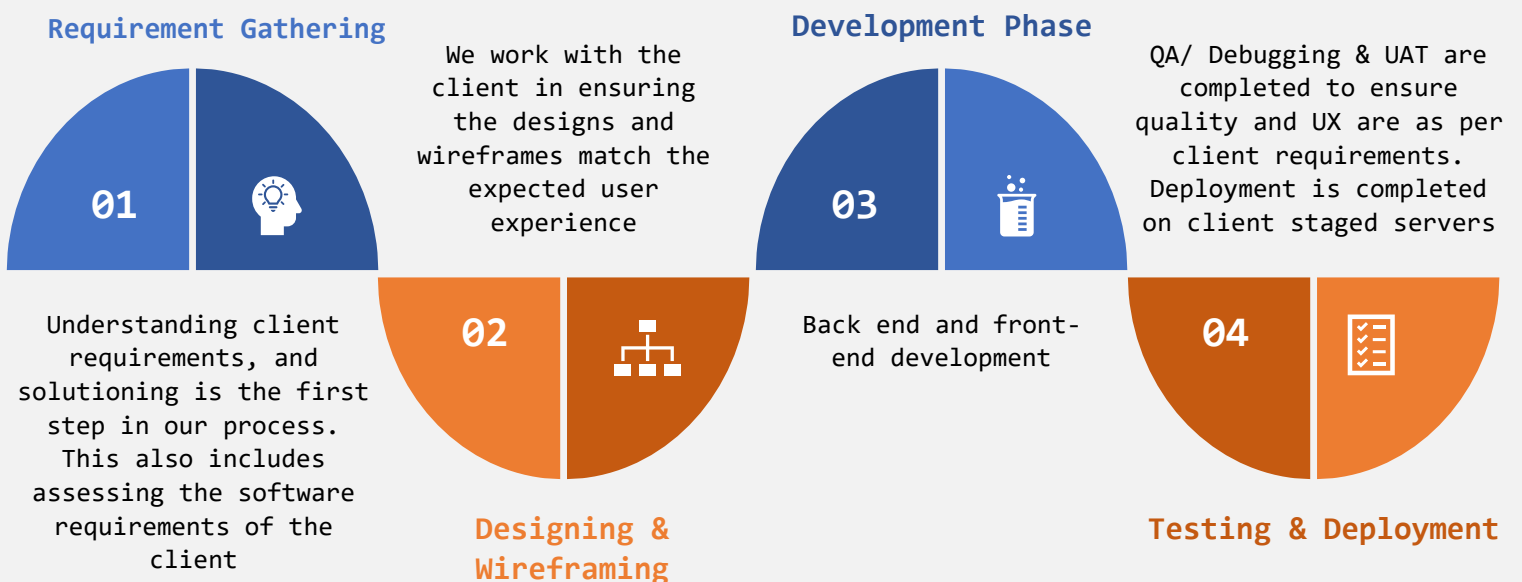

Welcome to the Technology

About Us

A division of Irah Solution, we are an India based company providing digital communications, web and mobile solutions to clients. We provide state of the art application development solutions using the latest technologies. With Quality and User experience at the core of our way of working, our team of designers and developers work to make things simpler, faster, and better to use.

Our offering includes various engagement models so we can serve the purpose of the client business whether it be a start up which is currently in the vision and strategy stage or clients with an existing user base. We work on creating and upgrading B2B, B2C mobile, web applications as well websites, digital and social media communication as well as production.

IRAH

The Process of Production — Mobile and Web Applications

Requirement Gathering

01

Understanding client requirements, and solutioning is the first step in our process. This also includes assessing the software requirements of the client

We work with the client in ensuring the designs and wireframes match the expected user experience

02

Designing & Wireframing

Development Phase

03

Back end and front-end development

QA/ Debugging & UAT are completed to ensure quality and UX are as per client requirements. Deployment is completed on client staged servers

04

**Testing & Deployment**

*Complete source code and product manual is handed to the client at completion

Our Services

Website development & Content

Supported by a strong development, design, content and communication production team our aim is to ensure all websites created by us are simple yet maximize the use of your real estate on the internet.

Simplicity and organic outreach are at the core of all websites and communication we build. We also support our clients with ongoing organic digital and social media outreach services.

Web & Mobile Application Solutions

We can help bring our clients vision to life by creating for them the simplest yet most user centric application solutions.
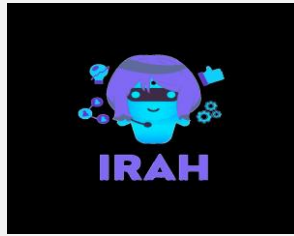

An example of such a solution is SportScene an Australian government initiative that was just a idea and is now a product ready to be deployed and tested across the state of Uttar Pradesh.

Enterprise Tech Solutions & Consulting

We have consulted and helped digitize organizations by building various enterprise applications including CRMs, Candidate Tracking Systems, Human Resource information systems, Financial information management, MIS & Reporting Solutions and more.

Further, our digital communication and content consulting strengths have helped clients grow and they have become long terms partners who we support through ongoing projects even post deployment of the applications.

Our Creation

1. CWPI MIS Tool

Internal tool made for Bihar government to successful integrate their promotion module.

2.Click Your needs

It's a mobile application used for delivering groceries and made for the user to get groceries on time with ease of user experience.

3.Triflix

It is a web application for Rajat Bedi(actor), for his new production house.
